

## Local subsidiary established in Dusseldorf, Germany

# MINATO MEDICAL SCIENCE TO PURSUE BUSINESS ACTIVITIES OVERSEAS

In 2025, Japan will officially become a 'super-aging' society. The older a society grows, the prevalence of age-related chronic diseases increases; consequently, there is a need for more user-friendly medical equipment for the elderly patients. Minato Medical Science continuously strives to improve its products, adopting the mission statement: "compassion for patients in the development of medical equipment."

With the demand for such "compassionate medicine" growing overseas, we are confident that the technology and products developed by Minato Medical Science in Japan can meet the medical equipment requirements of medical institutions around the world. To respond to those needs, we have developed sales channels in overseas countries and publicized the advantages of the products of Minato Medical Science through our annual exhibits at Medica, one of the world's largest international medical sector trade fairs.

In July 2018, in an effort to be more proactive in our overseas activities, Minato Medical Science established a local subsidiary in Dusseldorf, Germany, home of the Medica trade fair. This company will be our base for expanding our sales areas and offering more expedient customer support in the European markets.

Minato Medical Science is committed to further enhancing its service structure in Europe.
